

lives in order to serve others. People like Bob and Diane Greenlee were the cornerstone of our democracy and must be recognized for their contributions to our society.

Mr. President, it is an honor and a privilege to recognize Bob Greenlee on his outstanding career and community involvement. I would like to thank Bob and Diane for their service, and wish them both much success in the future.●

WORLD CHAMPIONS

● Mr. BIDEN. Mr. President, on August 26, 1999, 13 young women, ages 15 and 16, put the First State on the map again by capturing the Senior League Softball World Series in Kalamazoo, Michigan.

This was a tremendous accomplishment for Delaware and for the country. The Stanton-Newport team completed an undefeated run through the double elimination tournament by winning a come-from-behind victory over a persistent and well seasoned team from the Philippines.

As one reporter put it, eight teams participated in the tournament, but "only one will have its flag fly over the field for the next year." Proudly that will be the flag of the United States of America thanks to the team from the great State of Delaware.

The Stanton-Newport team is an outstanding example of the power of youth sports in America. As I have said many times in the past, young people need a hobby they love, at least one adult who supports them and a good many friends with similar interests. Organized sports provides this much and more.

In competitive sports young people learn responsibility, discipline, and the importance of cooperation and teamwork on and off the field. Later, these same young individuals will be able to apply their hard-earned lessons to everyday life.

The young women of Stanton-Newport epitomize the exceptional athletes and citizens from across the nation who are inspired on a daily basis by their committed parents and coaches.

I am proud to call this team a home-grown product and continue to salute their efforts on behalf of the First State and the rest of our nation. They are indeed World Champions.●

DR. EDWIN STRONG-LEGS RICHARDSON

● Mr. SMITH of New Hampshire. Mr. President, I would like to take this opportunity to recognize the outstanding work and accomplishments of Dr. Edwin Strong-Legs Richardson, Penobscot Indian Psychologist and President of Kiyan Indian Consultant Group. He is also known as Song-gan-la Gan-Naw, which is Penobscot for Strong-Legs and Kiyan Nakicinjin, which is Sioux for Flying Defender.

Dr. Richardson's admirable work ethic began at the age of thirteen when he started supporting his family as a

logger. He has long been a nationally and internationally renowned applied behavioral scientist, consultant, trainer, retired Army Officer, and Spiritual Leader. For over fifty years, Dr. Richardson has been an educator-trainer, including professional ski instructor, mountaineer, and military instructor. He was voted one of the top instructors at four different universities/colleges and number one at two institutions.

As a combat Infantryman, Dr. Richardson fought the Germans, Japanese, and Vietnamese and served as the Commanding Officer of a Psychiatric Detachment in the Korean War. During his service, he was awarded for bravery under fire by his enlisted men and also received a commendation from General Westmoreland for an emergency landing of an airplane.

Dr. Richardson earned a B.S. in Pre-Med from the University of New Hampshire and his Masters of Education in Physical and Mental Rehabilitation from Springfield College. He then went on to The Ohio State University to receive his Doctorate in Health Education and Counseling.

I commend Dr. Richardson in raising public awareness of cultural diversity through his teaching, television programs, and books he has authored. He is an outstanding model for not only the Native American communities, but for all communities. Please join me in recognizing Dr. Edwin Strong-Legs Richardson.●

TRIBUTE HONORING CHRISTINE RUSSELL

● Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Christine Russell, who last week left my staff after seven years as my legislative assistant and policy advisor on environmental, transportation and energy issues. She married Alex Wells on October 30th in South Carolina. She and her husband will be living in Harrisburg, PA.

As my primary staff member responsible for the Environment and Public Works Committee, which I now chair, she was one of my chief staff liaisons with New Hampshire municipalities in need of Federal assistance, and with the Federal and State agencies responsible for these important issues. Chris was always there for me, and for the people of New Hampshire. She will be terribly missed.

Christine came to my office from the National Association of Manufacturers a few years after I came to the Senate. She brought with her the skills to balance private sector and public sector concerns regarding environmental, energy and transportation issues. Skills which I found invaluable during her years in my office.

In addition to her outstanding policy skills, Chris provided a warm smile and enjoyable attitude to my Senate office. She was professional, intelligent, and articulate—but it was her enthusiasm and energy that was most infectious.

Chris was dedicated to her job, the U.S. Senate, and the people of New Hampshire. Alex is a very fortunate man, indeed!

Chris, on behalf of the people of New Hampshire and my entire staff, best wishes in all of your future endeavors. You deserve the best that life has to offer.●

EVERGREEN CARPET RECYCLING PLANT

● Mr. CLELAND. Mr. President, I rise today to express my support of private sector innovation to solve a public problem. My state is the site of a brand new, state of the art facility that will recycle carpets, chemically breaking them down to their virgin chemical components. Allied Signal and DSM are jointly opening the first-ever carpet recycling plant in Augusta, GA, on November 15. It's a fitting day for the opening of a carpet recycling plant since it is America Recycles Day 1999.

Carpets comprise of a significant portion of the Nation's landfills. Yet there are few programs at the state or local level targeted to redirecting carpets out of community landfills. The AlliedSignal-DSM facility, aptly named "Evergreen," will ensure that each year over 200 million pounds of carpet never see a landfill. Now it may be hard to imagine 200 million pounds of carpet, so let me help you visualize it. If you had a 12 foot wide roll of carpeting you could lay it from New York to San Francisco and back again, and that would equal about 200 million pounds. And the Evergreen facility will save that much landfill space each year.

The carpeting that will be recycled in Augusta will not simply be broken down mechanically and remade into new carpets. Instead it will be depolymerized—broken down chemically into the individual chemical polymers that comprise the nylon fiber in the carpets. The primary chemical is caprolactum, but they can't produce enough at their facilities to meet the demands of their customers.

So they had a choice to make—either find another source of caprolactum or build new chemical plants that could be used to make caprolactum. With dedicated research engineers, they made several technological breakthroughs that enabled them to obtain caprolactum from used carpeting in a more economical fashion than to produce it at a new chemical plant. They can actually recycle old carpets into caprolactum more economically than they could produce it from scratch.

Avoiding the production of caprolactum in itself yields tremendous environmental benefits. To produce from scratch the amount of caprolactum that the Evergreen facility will generate would take more than 700 million barrels of oil a year, and 4 trillion Btus more in energy usage. That is enough energy to heat 100,000
